

COMPANY PROFILE ■ ■

■ FOUNDATION OF JCCS INCORPORATION

Japan CCS Co., Ltd (JCCS) was founded in May 2008 when a group of major companies with expertise in CCS-related fields, including electric power, petroleum, oil development, and plant engineering, joined forces to answer the Japanese government's call for development of CCS technology as a countermeasure against global warming. JCCS is a peculiar company in the world to be founded and dedicated explicitly to develop integrated CCS technology.

■ KEY BUSINESS OBJECTIVES OF JCCS INCORPORATION

1. Accomplish comprehensive investigations and demonstrations for CCS projects in Japan
2. Integrate opinions from the private sector for early establishment of laws, regulations and technical standards applicable to CCS in Japan
3. Conduct promotional activities for CCS deployment in Japan
4. Cooperate with foreign organizations for CCS deployment overseas
5. Collect and exchange the latest information on CCS with overseas research organizations
