

Katherine Romanak

Dr. Romanak is an expert in environmental monitoring at geologic CO₂ storage sites. She has developed and implemented environmental monitoring programs at several large-scale U.S. Department of Energy Regional Carbon Sequestration Partnership sites. She has collaborated on international projects in Canada, Australia, and Japan. Dr. Romanak engages with stakeholders on the safety of geological CO₂ storage. She is a member of the International Steering Committees for the IEAGHG Monitoring and the Environmental Science Networks and serves on the Special Advisory Group to the Board of the Norwegian CCS Research Centre. She regularly informs global policy within the United Nations Framework Convention on Climate Change (UNFCCC) and is passionate about working with emerging countries to utilize UN funding mechanisms to develop their national CCS programs and supplying technology transfer.
